

# Tavistock Goose Fair 2021

## SUSTAINABILITY POLICY

*Tavistock Town Council are taking steps to help protect our natural environment & so can you!*

As part of the Council's on-going commitment to sustainability and the environment we are currently reviewing Goose Fair, more specifically with regards to the voluntary international standard ISO 20121 which offers guidance and best practise around sustainable event management, looking at how to control its social, economic and environmental impact with all aspects of an event's supply chain.

We recognise we all have a role to play in creating a greener, cleaner annual event for everyone to enjoy and so we encourage Exhibitors to work with us by:

- Undertaking a full audit of your business specific to single use plastics and packaging to help reduce and eliminate
- Considering what you could easily stop using and replace with a more environmental friendly option e.g. swap sugar, salt & pepper, sauces in single sachets with refillable containers
- Reviewing how you deal with waste management regarding the principles of 'reduce, re-use and recycle'.
- Consider how you can more efficiently implement power requirements e.g. type and use of generators
- Using recycling and composting refuse options for your waste management
- Reviewing compostable serve-ware and packaging guidelines to see how you can incorporate to your business at our event

For 2021 the Council will review the event as a whole regarding sustainability and environmental factors which may lead to a more robust approach in future years around reducing carbon emissions and waste and we thank you for your on-going support and future commitment in helping us to achieve measurable improvements.

Yours faithfully

Wayne Southall MBA (Open) BEng (Hons) Dip NEBOSH
